

- Durable, attractive, aluminum buckle. (No more broken plastic)
- Easily released with gloved hands, saving time.
- Positive latch will not unlock if bumped by equipment.
- Includes mounting hardware.
- Great for fire apparatus, ambulance, trailers etc.
- Short lead times.
- Limited 2-year warranty.

Developing products to make your job easier is our mission. On Scene Solutions took a hard look at cargo strap design and decided there needed to be a more “user friendly” design.

Since many professionals wear gloves when using equipment, our first concern was to make our buckle release easily accessible for gloved hands. The durable aluminum and brass buckle, features an easy to actuate latch system that will not release unless both actuator arms are engaged. Each buckle comes standard with a rub guard sewn in place, to avoid rubbing on equipment.

Extreme temperatures have proven to be hard on traditional plastic buckles, however our buckles are virtually unaffected by temperature or climate.

The strap is made of durable, attractive, nylon webbing that is resistant to most chemicals and comes in a variety of lengths.

Each strap comes with a 2-year warranty and comes complete with mounting hardware.
