## Versatile **LED** Lighting Systems

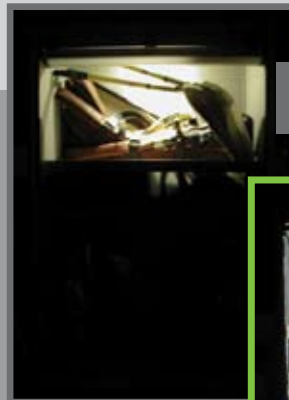

On Scene Solutions recognized early in the development of the "Night Stik" lighting system, that the development of unique, adaptable and affordable LED products was going to be of utmost importance to our customers. There are companies claiming to have the "brightest" LED's or the "most" LED's per application. These are important items, however the way the product is designed and integrated to make your job easier, is equally important. The Night Stik was designed to deliver the whole package!

On Scene Solutions has taken the approach of making our products adaptable to nearly any mounting location, durable, waterproof and most important, they are backed by a full 5 year warranty!

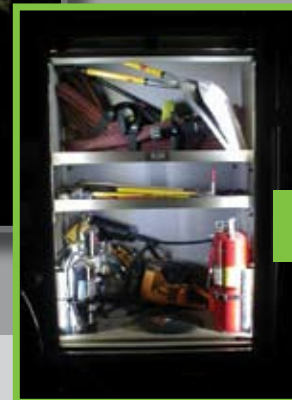

As technology evolves, you are guaranteed that On Scene Solutions stays current with the latest technology to ensure you have the most up to date products available, and at the best possible price.

## Versatile uses include:

- Compartment lighting
- Underbody and step lighting
- Walkway illumination
- Operators panel illumination
