OnScene Solutions listens to our customers! You came to us with a need for a new and modern cargo handling system and we delivered.

This rugged aluminum cargo slide system, boasts an attractive anodized finish with unsurpassed visual appeal. The features don't stop with the looks!

We realized that as important as looks were, we still had to develop a product that would hold up to the tough demands of everyday use by professionals. As a result of many hours of designing, testing and re-designing, we are happy to announce a slide that will endure a lifetime of use and make your job easier!

Let's face it, if you are installing equipment into a new vehicle, you deserve a product that will deliver the same level of engineering that went into your new truck. If you are retrofitting an older vehicle, why not update it with the latest technology?

The Future of Cargo Slides and Trays
