

1 CARGO SLIDES

SINGLE DIRECTION SLIDE
Extends up to 100% and features a 1,000-lb. capacity.

81 SERIES
Three-rail design for ease of use for single-direction, full-extension applications.

82 SERIES
Two-rail, low-profile design perfect for compartments with lower ceiling heights.

DUAL-DIRECTION SLIDE
Features 70% extension and up to 1,000 lbs. of capacity.

83 SERIES
Heavy-duty cargo slides feature up to 1,000 lbs. of capacity and 70% extension and are available in 40-96" depth.

85 SERIES
Narrow design to accommodate tall, slim compartments as well as vertical tool boards with a weight rating of up to 1,000 lbs. at full extension.

SLIDEOUT TILT-DOWN
Provides 30-degree access for high storage areas.

84 SERIES
Out-and-down cargo slide for those hard-to-reach areas that can hold up to 250 lbs. of capacity.

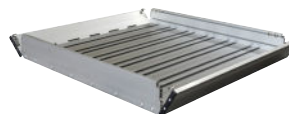

819 STEP SERIES
Three-rail slide step that mounts under the truck body and supports 500 lbs.

2 CARGO TRAYS

CONFIGURABLE TRAY
This anodized aluminum tray features configurable mounting points in the tray sidewalls and floor slats, with standard front and optional rear gates.

3 CARGO STRAPS

CARGO STRAPS
These heavy-duty cargo straps are made of durable, chemical-resistant nylon webbing, and gone are the days of broken plastic buckles thanks to OnScene's aluminum buckle design.

QUICK - RELEASE STRAP
Featuring a quick-release design, the OnScene Solutions' cargo strap is a favorite among on-the-go crews. This design releases with the swipe of a gloved hand but stays secure even if the buckle leans up against other cargo.

2-PART VELCRO STRAP
The OnScene Solutions' Velcro Cargo Straps feature a blue pull tab and reflective strip to help responders quickly release the strap for fast equipment deployment in the harshest of conditions.

4 CARGO LIFTS

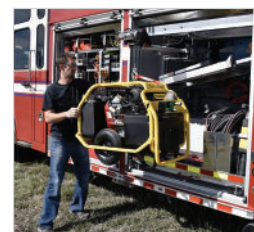

HEAVY CARGO LIFT SYSTEM
Let the X30 do the heavy lifting. With a 500-lb. capacity, the X30 lowers heavy equipment with the push of a button.

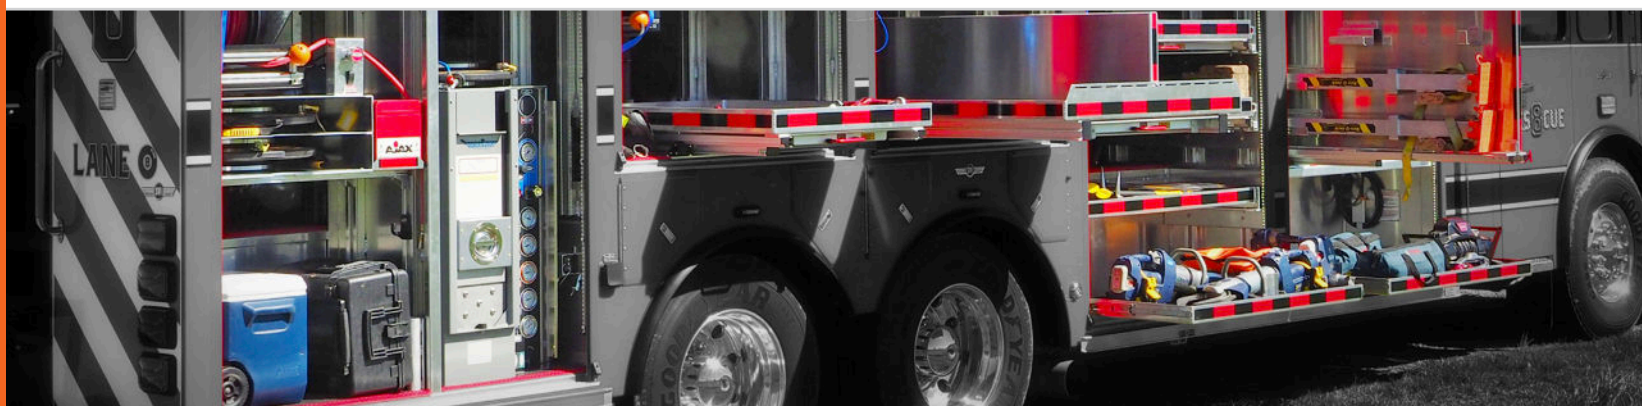

SIDE MOUNTED WINCH
When confined by height, a side mounted winch is a good solution for removing heavy and awkward equipment.

OVER-HEAD WINCH
For heavy equipment, when there are no height restrictions.

HEAVY-DUTY WINCH
A well placed winch can help one person remove heavy equipment that would normally take up to four.

5 LED CARGO LIGHTS

COMPARTMENT LIGHTING

Your truck's cab and compartment lights are just as vital as brow lighting or light towers in creating a workable, well-lit scene. OnScene Solutions offers LED cargo lights and LED cab lights, as well as LED light bezels.

NIGHT AXETM

The industry's only linear tube lighting system to be UL/ULC certified, the Night Axe™ features PWM technology to reduce amperage draw and heat, ensuring a 100,000-hour lifespan.

ACCESS

Available in white, red or blue lighting, the Access compartment lighting system delivers an abundance of luminous output for extreme lighting situations when tight budgets are a factor.

6 LED LIGHT BEZELS

LED LIGHT BEZELS AND LED MOUNTING CLIPS

OnScene Solutions' LED light bezels provide attractive yet durable housings with built-in Access or Night Axe™ cargo lights. The waterproof design can count to most any flat surface.

ANODIZED ALUMINUM

These light bezels are corrosion-resistant aluminum finish with optional end-cap mounted switch; available in 6-72" lengths and walkway and under-cabinet angles.

POLISHED CAST ALUMINUM

Choose our economical polished cast aluminum finish, which delivers an attractive high luster; available in 9" or 18" lengths and walkway and under-cabinet angles.

BALL BURNISHED CAST ALUMINUM

The economical ball burnished cast aluminum finish delivers on a non-reflective look; available in 9" or 18" lengths and walkway and under-cabinet angles.

7 LED CAB LIGHTS

CAB LIGHTS

OnScene's red-white capable lights pull extra duty thanks to remote switching ability, a park brake interface and time domed feature. Use these interior LED fire truck lights as your dome, map and cab light.

DELUXE LED CAB LIGHTS

OnScene Solutions' red-white capable interior cab lights pull extra duty thanks to remote switching ability, a park brake interface and timed dome feature. Use as your dome, map and cab light!

White Red

STANDARD INTERIOR LED CAB LIGHTS

OnScene Solutions' standard LED surface-mount interior cab lights are available in white or white/red.

8 GROUND RUB RAILS

GROUND ILLUMINATING RUB RAILS

Eliminate the tedious task of manufacturing rails with these pre-manufactured Aluminum Rub Rails, featuring a recessed design to protect optional DOT reflective tape or marker lights. Optional waterproof lights attach to the rail's rear side, directing ground lighting to the operator's feet. Billet aluminum end caps are standard with a recessed fascia to protect optional LED marker lamps and reflective tape from damage.

9

TALON HELMET BRACKET

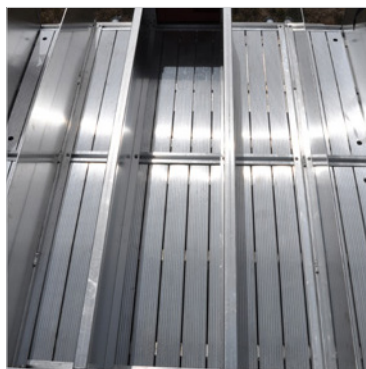

TALON HELMET BRACKET

An innovative solution that meets NFPA 1901 helmet containment requirements, OnScene's patented Talon helmet mount features multiple adjustment points to fit nearly any helmet brim, including traditional, non-traditional and European-style helmets, as well as the new Rosenbauer helmet.

10

HOSE BED SLATS

HOSE BED SLATS

Lightweight yet durable, these Aluminum Fire Truck Hose Bed Slats can be ordered in lengths up to 146" or can be custom cut. The extruded slats feature channels that allow hose moisture to easily escape, while the grooved channels provide a slip-resistant walking surface for crews.

11

SCBA STORAGE SYSTEM

SAFESYSTEM HOLDER CARRIER

Air cylinder management system that allows a single firefighter to carry four compressed cylinders at one time for efficient transport. The T handle on the Holder Carrier locks the cylinders into the carrier as well as the truck compartment, mobile cart or station rack, providing safe, secure storage.

SAFESYSTEM COMPARTMENT BASE

The SafeTSystem Compartment Base installs in an apparatus compartment to easily secure 2 or 3 holder carriers for transport.

12

HOSE REEL EXTENSIONS

HANNEY REEL FAIRLEAD EXTENSIONS

OnScene Solutions' Hannay Reels position the end of the hose or cord closer to the compartment door opening to provide easier access and to eliminate damage to door seals and Hannay hose reels.

VERTICAL MOUNT

This vertical mount fairlead extension fits 26-29" and 29-32" compartment depths.

HORIZONTAL MOUNT

This horizontal mount fairlead extension fits 29-38" compartment depths.
